

# Fishery Reports

**Wylands International AC** Battle, East Sussex

The beginning of September saw some exceptionally mild weather with the fish on the munch before the cold winter sets in.

**HOUSE LAKE** - has fished well throughout the month, with some large fish putting in an appearance. There has been no particular swim that fished better as the fish have been spread about throughout the lake. The size of carp are on the up in this prolific little lake.

**NEW SPECI** - has been a very popular lake through September with some fantastic catch reports coming in. The removal of some single figure fish is now paying dividends and the lake now boasts a good head of 20lb plus fish.

**OLD SPECI** - is also proving to be a popular lake. The lake has benefited from the introduction of some more double figured carp. The fishing has been prolific with smaller baits now coming into their own.

**MIDDLE LAKE** - has proved yet again to be a fantastic water with many double figure fish coming out.

**FIELD LAKE** - has been producing some cracking small carp over the past month and is as popular as ever. This is a great lake for children to try their hand at fishing.

**KELL** - we have many carp going over the magic 30lb mark this year and a few more not far behind. We are certain some new pbs will be landed this coming winter.

With the colder months just around the corner Wylands will be holding it's 3rd Carp Cup. All are welcome to participate. Please keep an eye on our face book page for match dates and how to enter. Also, don't forget we have a variety of accommodation with prices starting from £110 to include all your fishing.

## Gabriels Fishery Edenbridge, Kent

Finally with the changing temperatures fishing has become a lot more rewarding and comfortable. Sitting among the breeze of trees is extremely relaxing way to spend any day, especially during the early part of the week where it much quieter. Beautiful Common and Mirror Carp are coming out from Admiral and the fish have been ranging from 31lb up to 38lb. Maggots are catching the attention of the Perch in Silver Lake. Roach and rudd are putting on weight in Hare lake and a large number of Roach are being caught on strawberry sweetcorn. The river is catching up but the water level is still low. Fishing above the Weir has rewarded many with 5lb chub and even a 14lb female pike has been caught. Maggots and Hemp seem to be the favoured bait here. We have a variety of bait and tackle available for sale here in the visitors centre. Maggots and worms can be purchased from the vending machine which is 24/7. We have some superb deals to be had!

Don't forget to send us stories and photos of your catches here at Gabriels Fishery, either by Instagram – gabrielsfishery1, Facebook, twitter, Whatsapp, email or text – 07730 066088!
