## Framfield Park Fishery Uckfield, East Sussex

**SPRING LAKE** - fishing very well with weights in excess of 150lbs needed to win most matches. Pegs in the 60's and near the gap in the island proving to be the better pegs although most pegs are producing very well. Best baits are pellet, corn, maggot and meat when fished at 10 metres and close to the islands, with better carp to 15lbs showing later in sessions under the near bank. Some good Perch to 3lbs showing when fishing worm close in.

**BROOKHOUSE LAKE** - pegs at either end of the lake are proving very productive when fished on the pole or bomb to the island. Best baits are pellet and corn, with bread on the bomb a good alternative to catch quality Carp with better specimens to 15lbs showing against the near bank when fishing pole or waggler.

**BURYWOOD LAKE** - pegs on the Car Park side fishing very well with Carp to 20 lbs showing when fishing popped up boilies close to features. Some quality Cat Fish to 40 lbs showing from pegs on the far side close to the island, some better specimens should show with the increase in temperature.
