

FRESHWATER INFORMER **f**

LOCKDOWN UPDATE – FEBRUARY 2021

Firstly, I hope you are all well during these unprecedented times!

As you are aware, the last issue of the magazine was a combined issue for both December and January. Due to the ongoing restrictions, I am unable to bring you a magazine for February.

Catch reports have been minimal due to anglers having to fish locally and indeed, many anglers have told me that they have put away their gear until happier times arrive. Like everyone else, I hope that those brighter days will come sooner rather than later, but until those times do arrive, we have little choice but to continue to keep your favourite angling magazine in 'hibernation'.

I will continue to keep the situation under close scrutiny and once trading conditions become more favourable, the Freshwater Informer WILL be back, bigger, better and stronger than ever!

I truly appreciate everyone's continued support at this time and you can keep in touch by following the Freshwater Informer's Facebook page which I keep refreshed with interesting articles, news and photos on a daily basis.

Stay safe and stay well!

kindest regards to you all, Barry Reed
